

KEEP IT FLOWING

PuRoMax Pure R/O To The Max

The quality of drinking water is on everyone's mind today. Bottled water sales have skyrocketed. Municipal water treatment plants add chlorine to kill germs. This municipal water is tested for our safety at the plant. However many contaminants, such as lead and asbestos can be introduced by pipes that supply water to our home.

Bottled water is expensive and inconvenient. But how do you get quality water from your own refrigerator and ice maker? How do you get quality water without breaking the bank or your back?

Because coffee and tea are 99% water, they are no better than the water with which they are made. The PuRoMax system delivers better tasting coffee, tea and clearer ice. Your pets and plants will love it too.

PuRMax Delivers!

Quality water that exceeds most bottled for only pennies a gallon.

Quality water right at your fingertips. **Quality** for ice and prepared beverages.

PuRoMax - C4-T-50-P-38-AG

4 Stages:

- (1) 5 Micron Sed Pre Filter
- (1) NSF Certified Carbon Block Pre Filter
- (1) NSF Certified 50 GPD Membrane
- (1) Inline Carbon Post Filter 3/8

Complete Install Kit:

- (1) NSF Certified Air Gap Chrome Faucet
- (1) 1/4 Tank Valve
- (1) 1/4 Feed Valve
- (1) 3/8 Drain Clamp
- NSF Certified 1/4 and 3/8 Tubing
- NSF Certified Quick Connect Fittings
- NSF Certified Filter Housings
- NSF Certified Membrane Housing
- NSF Certified 4 Gallon Tank

Operating Pressure	Feed Water	Cubic Feet	pH
60psi	77°	500ppm	6.5-7

Nominal Rejection Rates for typical R/O units

Aluminum	96-98%	Fluoride	93-95%
Arsenic 5.....	94-96%	Lead	96-98%
Bacteria	99+%	Magnesium.....	95-98%
Barium.....	96-98%	Manganese.....	94-96%
Cadmium.....	95-97%	Nitrate.....	92-95%
Calcium	94-97%	Phosphate	97-98%
Chlorine.....	90-95%	Silver	95-97%
Chloride.....	90-95%	Sodium.....	94-98%
Copper	96-98%	Zinc.....	96-98%
Cyanide	90-95%
